

Rescue Grab Hooks

The Rescue Grab Hook is manufactured with a heavy duty steel head coloured orange/red. Handles are manufactured from straight grained Ash of approximately 40 mm diameter, which is strong and non heat conductive.

The handle is of a two part construction with a heavy duty screwed brass ferrule.

Primarily intended for dragging persons from fire situations.

Blunted points permit a bite into clothing without tearing the material.

Total Length Assembled 4.15 m.

Weight 5 kg.
